

Imagine not being able to access or afford a wheelchair?

Assist ME provides FREE, essential mobility equipment to individuals with low incomes and little to no insurance to help them move safely from hospital to home or from home back into community life with dignity and independence.

● Too many children and adults go without the mobility equipment they need after injury, surgery, or chronic illness – or may experience Medicaid gaps and long approval delays that also leave them at risk.

● Assist ME bridges these health equity gaps through community support – enhancing lives through mobility – TOGETHER!

Need help?

Visit www.AssistMEnc.com to review guidelines and apply for equipment
